

Quiz

- 1) Understand what Kubernetes doesn't do from here (<https://kubernetes.io/docs/concepts/overview/>) and explain in your own words. Do not copy and paste from the website.
 - CI/CD Autonomy: It doesn't handle source code deployment or application building,
 - Service Omission: Kubernetes lacks built-in application-level services like middleware, databases, caches, and cluster storage systems, encouraging their independent deployment or access via portable mechanisms.
 - Logging and Monitoring Neutrality: It does not dictate logging, monitoring, or alerting solutions.
- 2) What other Orchestration tools are available other than Kubernetes
 - Docker Swarm
 - Apache Mesos
 - Rancher
 - OpenShift
 - Amazon ECS
